Dated: 03/07/2015.....

TO WHOM IT MAY CONCERN

We have been regularly using Green-AG for more than a year for composting waste material like Straw, poultry waste, piggery waste, dry leaves, garden waste etc in different locations of the beneficiaries. We have found the following advantages of using the product:

1. Compost is ready within 40 to 45 days, which gives us a better turnaround time.
2. The nutrient content is higher and of good quality.
3. The product can be directly applied to soil and does not need to be acted upon.
4. It is found reduction in foul odour and flies at composting sites.
5. Doesn't require any turning the windrows and heaps.

We wish them a good future.

(L. Suranjoy Singh)
